Roller Blinds

Modern interiors demand simplicity, light control and comfort, and roller blinds deliver all three with ease. Offering both style and functionality, they block out light, reduce heat and glare, and disappear seamlessly when not in use. The slimline fit and sleek, contemporary design make roller blinds ideal for any room.

Crafted in New Zealand, these blinds are made to high standards of quality, featuring quiet, smooth operation with Rollease Acmeda componentry.

Combining elegance, practicality and ease of use, roller blinds are the perfect addition to any space, providing modern living solutions that enhance both style and comfort.

Chain Control
A classic option offering easy operation with a chain mechanism. Simple and reliable for everyday use.

Motorised
For ultimate convenience, motorised blinds offer remote or app control. Perfect for hard-to-reach windows or to automate daily light adjustments.

Create an inviting interior space with the sleek simplicity of roller blinds, offering smooth operation, excellent light control, and a clean, minimal look that works in any room.

Fabric

Colour & texture – the key to designing exceptional spaces. Our extensive range provides a rich palette to create unique and engaging environments.

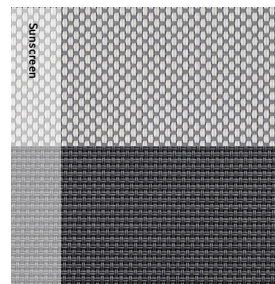

Achieve full light control and privacy. Available in a range of colours and textures, perfect for bedrooms and living areas.

Add personality with decorative prints and textures. Patterned fabrics combine style with everyday function.

Light Filtering fabrics gently diffuse natural light while maintaining privacy. Create a warm, ambient glow without harsh glare.

Enjoy your view while reducing heat and UV exposure. Sunscreen fabrics offer light and heat control, perfect for bright living areas.

Cassette & Valance Systems

Valance Systems and Cassettes elevate roller blinds with added functionality and a refined, modern finish, concealing the blind mechanism to enhance light control and protect fabric from dust and sunlight.

FRS100 & FRS120

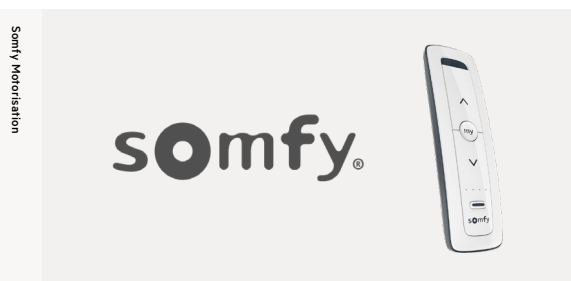

The FRS Valance is a decorative fascia available in two sizes, featuring a symmetrical design, colour-matched end covers, and optional fabric inserts.

Cassette 90

The Cassette 90 delivers excellent blackout and energy efficiency, with a fully enclosed cassette or fascia and optional dim-out side channels for improved light control.

Automation

Roller blinds can be automated to respond to the touch of a button, offering effortless remote operation and a sleek, chain-free design. Motorisation ensures easy access to high or hard-to-reach windows, making it ideal for any space.

Easily retrofitted or integrated with home or commercial automation systems, motorised blinds can be operated individually or grouped by room or area. Choose between a wall-mounted switch, remote control, or seamless connection with your building management system for ultimate convenience.
